Novelty and Inventive step

None of these citations or any obvious combination of them discloses all of the features defined in your claims. In particular the feature of a wireless communication system as defined in claim 1 wherein the CTU comprises a headset having first and second speakers with the first and second channels connected to the first and second speakers respectively to allow a user to listen to communications on the first and second radio channels concurrently. As such I consider that these claims are both novel and inventive over these citations.
